

Online
MASTER OF BUSINESS ADMINISTRATION
MBA

Lead the way.

ACU's online Master of Business Administration prepares professionals for Christian service and leadership in the global marketplace.

An MBA is a highly valued degree in today's marketplace.

The Graduate Management Admissions Council reports that three in four employers plan to hire MBA graduates in 2016, and the Department of Labor reports that those with business-related master's degrees earn an average of 20 percent more than their counterparts with a bachelor's degree.

ACU's fully online MBA program combines courses in leadership, organizational innovation, data-informed decision-making, faith and ethics to equip you to think critically, globally and missionally.

Designed with the working professional in mind, ACU's MBA program is flexible, convenient and accessible – and you will be part of a dynamic online learning community of your peers and instructors. The payoff of an MBA begins well before graduation: as you take your classes, you can implement what you've learned immediately into work.

Ready to grow professionally and take your career to the next level? Contact ACU today to learn more about our MBA program.
